Caramel Colour

PACKAGING AVAILABLE :	1Kg 5Kg 40Kg 65Kg 200Kg Customize Packing Available
PACKAGING TYPE :	Jars Barrel
COLOUR :	Black
FORM :	Liquid
APPLICATION :	Beverages Sauce and Seasoning Baked Goods Cake Premixes Desserts Confectioneries Pet Foods

Class I : Caramel Colors are the most minimally processed . The carbohydrate raw material is simply heated, and no other compounds are allowed in Class I or E150a production. The resulting Caramel Color carries a neutral to slightly negative ionic charge.

Class III : Ammonia Caramel Colors, are comparable to E150c. The carbohydrate raw material is heated in the presence of ammonia compounds. The resulting low-sulfite Caramel Color carries a positive ionic charge.

Class IV : Sulfite Ammonia Caramel Colors, are comparable to E150d. The carbohydrate raw material is heated in the presence of both sulfite and ammonium compounds. The resulting Caramel Color carries a negative. Class IV Caramel Colors are the most widely produced Caramel Colors, and are commonly found in colas.

NATURAL FOOD COLOURS
